### Functions

#### Smart H.265+ & Smart H.264+

With advanced scene-adaptive rate control algorithm, smart encoding technology realizes the higher encoding efficiency than H.265 and H.264, provides high-quality video, and reduces the cost of storage and transmission.

#### Full-color

With high-performance sensor and f1.0 large aperture lens, cameras can display clear colorful image in the environment of ultralow illuminance. With this photosensitivity design, the camera can capture more available light, and display more colorful image details.

#### Motion Detection

When moving objects appear in the monitoring image, alarm or records will be triggered.

#### 4K Network Video Recorder

- 2 TB Pre-installed Hard Disk Drive.
- Smart H.265+/H.265/Smart H.264+/H.264 Decoding Format.
- Up to 12 MP Resolution for Preview and Playback.
- Maximum 80 Mbps Recording Bandwidth.
- Support Remote Review/Playback and Management of Network Cameras.

#### 4MP Network Camera

- Outputs max. 4 MP (2560 × 1440)@25/30 fps.
- 2.8 mm fixed lens.
- Built-in warm light, and the max. illumination distance is 30 m.
- Motion Detection.
- IP67 Ingress Protection.

#### Cyber Security

Cameras in this kit employ a series of security technologies, including security authentication and authorization, access control protocols, trusted protection, encrypted transmission and encrypted storage. These technologies improve the camera's defense against external cyber threats and prevent malicious programs from compromising the device.

#### Protection (IP67, Wide Voltage)

IP67: The camera passes a series of strict tests on dust and soak. It has dust-proof function, and the enclosure can work normally after soaking in 1 m deep water for 30 minutes. Wide voltage: The camera allows  $\pm 30\%$  (for some power supplies) input voltage tolerance (wide voltage range), and it is widely applied to outdoor environment with instable voltage.

#### Remote Review/Playback

You can remotely access the network video recorder, view live video, receive event push notifications, and search for recorded videos from a mobile device at anytime from virtually anywhere.
