

## JUST ONE PICK

AcuPick technology can help you reduce the amount of time spent finding a specific person captured on your security footage. With a single reference image, you can find, track, and identify a specific person of interest.

### I Key Values

#### Quicker Search

AcuPick can quickly locate video clips of human/-vehicle targets, saving up to 99% searching time.

#### Easier Operation

Compared with traditional searching mode, AcuPick only needs 1 pick to extract targets, saving lots of complex operation.

#### High Accuracy

AcuPick provides users with high accuracy through its comprehensive eigenvalues for human and vehicle targets.

#### Reduced TCO

With lower operation costs and no expensive computing server needed, the total cost of ownership is significantly reduced.
