The Future Of Medicine

About Us

UNICHECK HOLDINGS GROUP

Unicheck Holdings Group is a Canadian innovative company which is a fully owned division of UniDoc Health Corp. focused and committed to deliver rapid, real time diagnostic, treatment, therapeutic and continued health monitoring for an innovative and modernized approach to the Healthcare & Telemedicine industry.

Improving the Patient/Doctor Relationship

Unicheck Brings Doctors and Patients Closer Together

Care providers are used to treating and seeing their patients in person, through its telehealth virtual clinic solutions. UNIDOC can actually improve the doctor-patient relationship by eliminating commuting and scheduling impediments and offering the same ease and familiarity as face-to-face patient interactions.

Unicheck's Telehealth systems can actually increase the rate of communication between doctors and their patients so that both parties can access the information they need when they need it most.

Preserving the Doctor-Patient Relationship.

The Unicheck platform is designed to replicate the in person experience. Doctors receive all the diagnostic readings from the medical devices as well as clearly see and hear their patients during the virtual consultation to properly diagnose their symptoms with the same accuracy as an in person visit.

Smart Health Clinic

We provide patients with the convenience and flexibility of having virtual healthcare visits at a point of service closest to their residences.

We allow physicians to expand their practice beyond the walls of their clinics with full access (real-time) to the patients' clinical data and vital signs.

We enable organizations to set up a low cost point of service for virtual visits without the financial barriers of in-house physicians' recruitment and retention.

Unicheck effectively creates a Smart Health Clinic to manage the patients needs from basic General Practitioner visits, diagnostics and laboratory services through a seamless network of services.

NEIL Platform

The NEIL platform is a scalable turnkey telehealth service that provides an off-the-shelf, white label platform.

Able to communicate in 130 languages and with people with health conditions or impairments.

NEIL supports all of the vital components of a telehealth program including patient intake, virtual consultations, electronic medical records management, provider consult documentation, visit coding, and patient billing.

UDOC-2022GP-A

INCLUDES:

- USB Electronic Stethoscope
- Versa Scope
- All-in-One Vital Signs Monitor with: SpO2, BP, pulse rate, temperature
- IT & communication equipment, software, licenses

Tests Available from Blood Samples

HbA1c
CRP
Lipids Panel
Blood Glucose
Blood Creatinine PT/INR

Tests Available from Urine Samples

Urine Creatinine
Urine Albumin

Capillary Blood Analyzer

A point-of-care (POC) analyzer that features a clinically important menu of 10 measured and individually selectable tests, in addition to 7 calculated tests. All tests are measured with disposable, ready-to-use cartridges or test strips, and are easily performed by non-technical personnel using a very small capillary blood drop for all blood tests.

ECG/EKG

Touch-ECG System - Android configuration. Comfortable, lightweight, wireless and fully diagnostic 12 lead ECG acquisition unit.

Compliance and Regulations

All medical devices are FDA, Health Canada and European Union Approved and Registered.

Quality Best Practices

FDA Certified; ISO 13485; and FDA GMP

Physical Examination Tests

Primary Care

Family Medicine, Internal Medicine, Pediatrician, OBYN and Internal Medicine-Pediatric Doctors

- Pulse Oximetry
- Blood Pressure
- Temperature
- Measurements
- Oxygen

Examinations

Ear | Nose | Throat | Heart | Lung

Universal HL7 and EMR Filing

Seamlessly export information collected during a patient session to a single HL7, FHIR based file. The HL7 module eases the integration with your organization's infrastructure by providing a file that can interface with EMR systems. In a single step, information is ready to be stored with the patient's record.

EHR Interoperability
Cloud-Based ... Scalable ... Customizable

Physical Examination Tests

Secondary Care

Cardiologists, Vascular Interventionists, Gastroenterologist, Ophthalmologist, Dentist.

- EKG – Cardiology
- Stroke Volume, Cardiac Output, Cardiac Power Index, Total Peripheral Resistance, Left Ventricle Systolic Function and Total Body Water

Examinations

Cervix, vulva, vagina | Horus Scope Vascular Ultrasound
 Ultrasound/OB/GYN | Abdominal Ultrasound
 Dental Camera

Physical Examination Tests

Specialist Tests (Future Development)

- Non Midriatic Retina Camera
- Blood Analysis
- Urine Tests
- Dialysis
- X-rays
- CT scan
- Digital Video
- Colposcope

Our Partners

Unicheck has partnered with internationally recognized companies in the HealthCare, Pharmaceutical and Logistical Infrastructure as well as the Information Technology world to help develop and bring the world's most innovative solutions in the Health Care Industry.
